

Works with any car that already has wired Android Auto.

AirFly Drive turns the Android Auto you plug in today into wireless Android Auto. If a cable gets you Android Auto now, you're set.

Not sure? Check your car in 10 seconds.

1. Plug your Android phone into your car's USB port with a cable.
2. If Android Auto opens on your car's screen, AirFly Drive will work.
3. If nothing happens, your car doesn't have factory Android Auto and no adapter can add it.

Features vary by model year and trim. If your car or year isn't listed, or you're not sure, confirm factory (wired) Android Auto with your dealer or manufacturer before buying.
